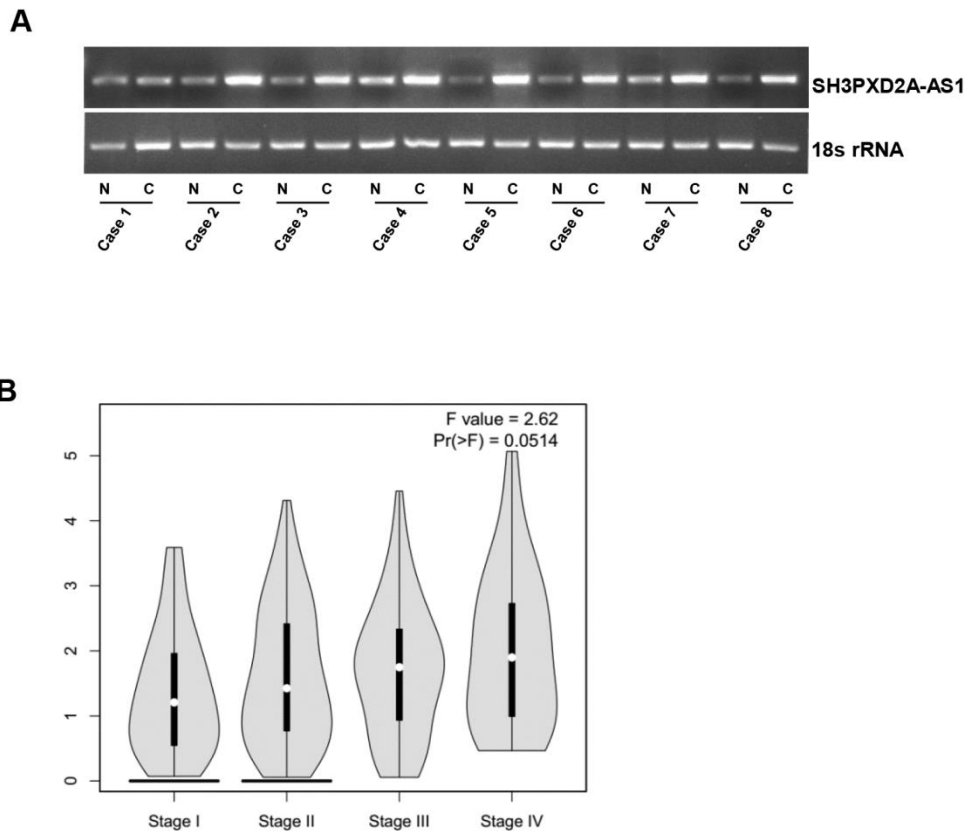

Figure S1. SH3PXD2A-AS1 is overexpressed in CRC tissues. **(A)** SH3PXD2A-AS1 is upregulated in CRC tissues detected by RT-PCR running on gel electrophoresis by using paired colon tissues. **(B)** SH3PXD2A-AS1 expression in different stages of CRC in TCGA database analyzed in the GEPIA website (<http://gepia.cancer-pku.cn/index.html>).

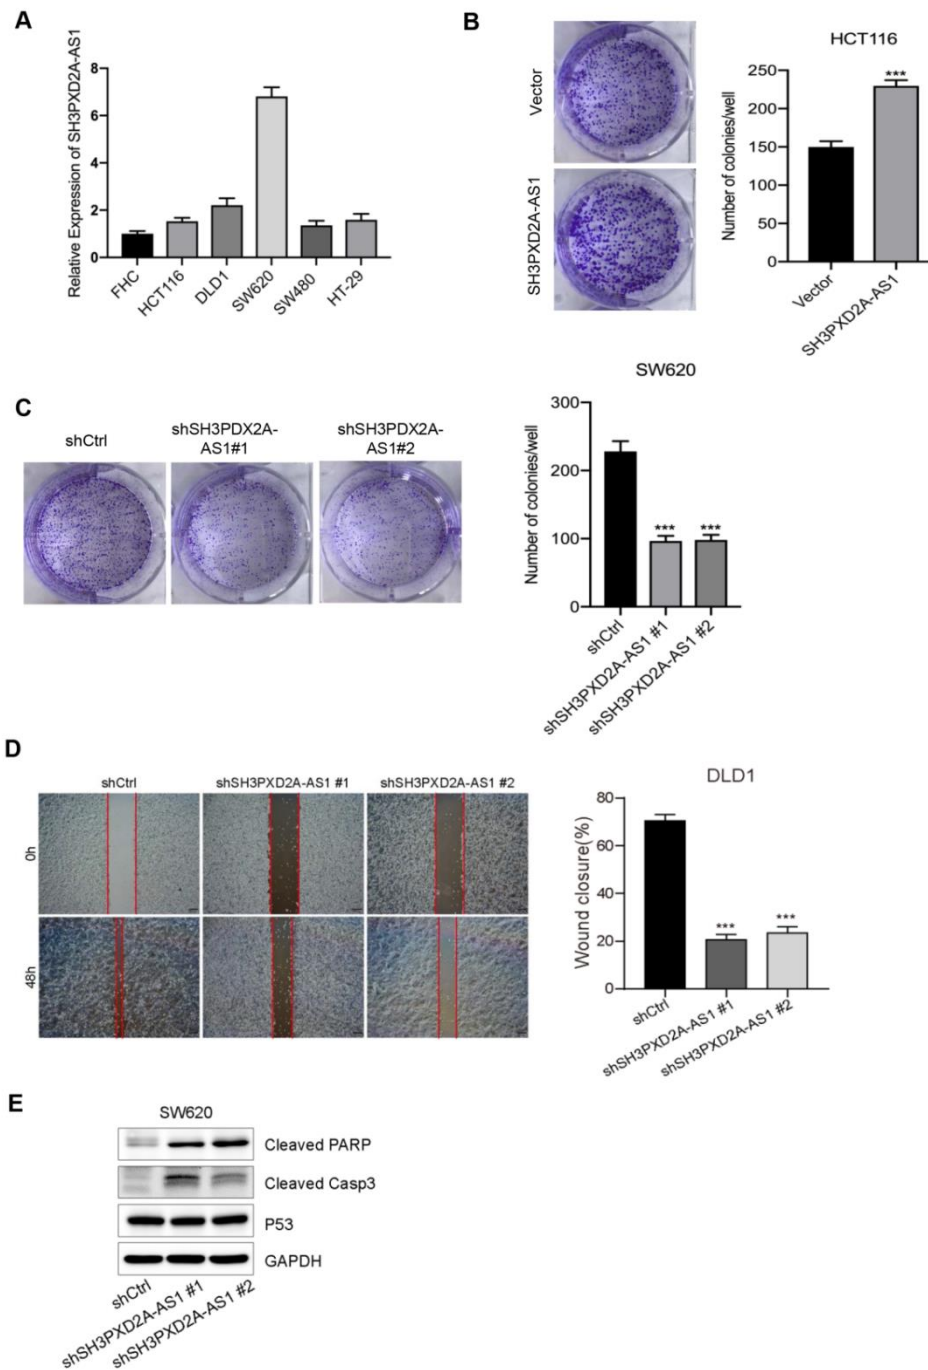

Figure S2. SH3PXD2A-AS1 promotes CRC proliferation and migration. **(A)** SH3PXD2A-AS1 expression was detected in CRC cell lines and the normal colon cell line, FHC. **(B-C)** SH3PXD2A-AS1 promotes CRC cells colony formation. **(D)** SH3PXD2A-AS1 Knockdown inhibits wound healing in DLD1 cell. **(E)** SH3PXD2A-AS1 knockdown increases the expression of cleaved PARP and cleaved casp3. *** $p < 0.001$ by two-tailed Student's *t* test.

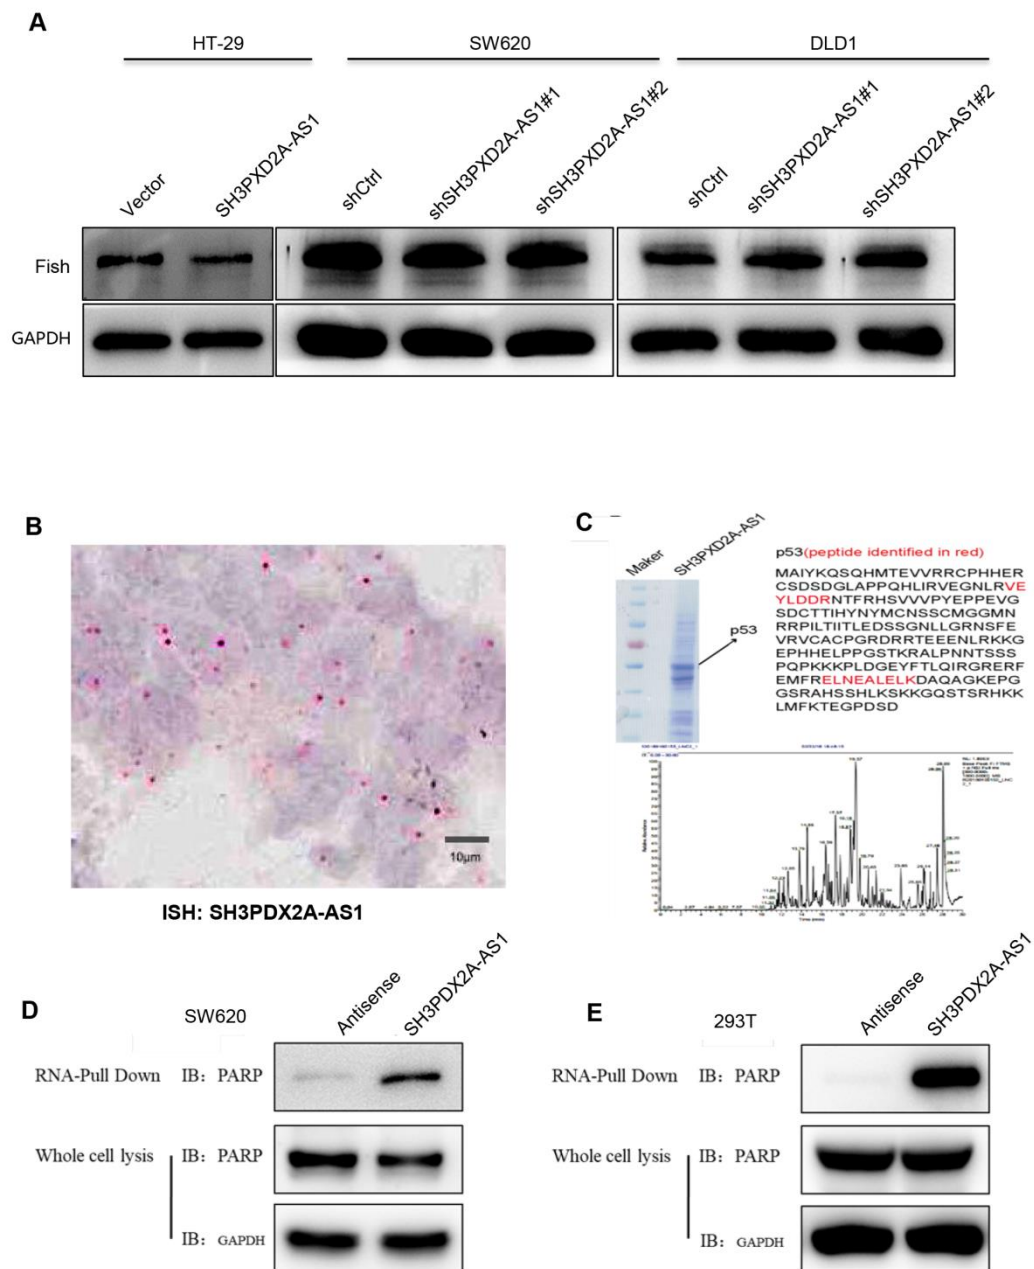

Figure S3. SH3PXD2A-AS1 can also interact with PARP. (A) SH3PXD2A-AS1 did not affect the protein expressions of the neighbor gene, Fish (B) RNA-ISH showed SH3PXD2A-AS1 located both in the nuclei and the cytoplasm CRC tissues. (C) Mass spectrum analysis of SH3PXD2A-AS1 binding proteins. (D-E) Biotin-RNA pull-downs followed by Western-blot by using Anti-PARP in SW620 and 293T cells.

Figure S4. SH3PXD2A-AS1 Knockdown did not affect the distribution of p53 in nucleus or cytoplasm. Immunofluorescence of p53 in shCtrl、shSH3PXD2A-AS1#1 and SH3PXD2A-AS1#2 SW620 cells.

Figure S5. Gene ontology analysis of SH3PXD2A-AS1 related pathways by using RNA-seq data. (A-B) Differentially expressed genes defined by functionally enriched gene ontology (GO) terms and pathways involved in cadherin signaling pathway, Wnt signaling pathway and P53 pathway

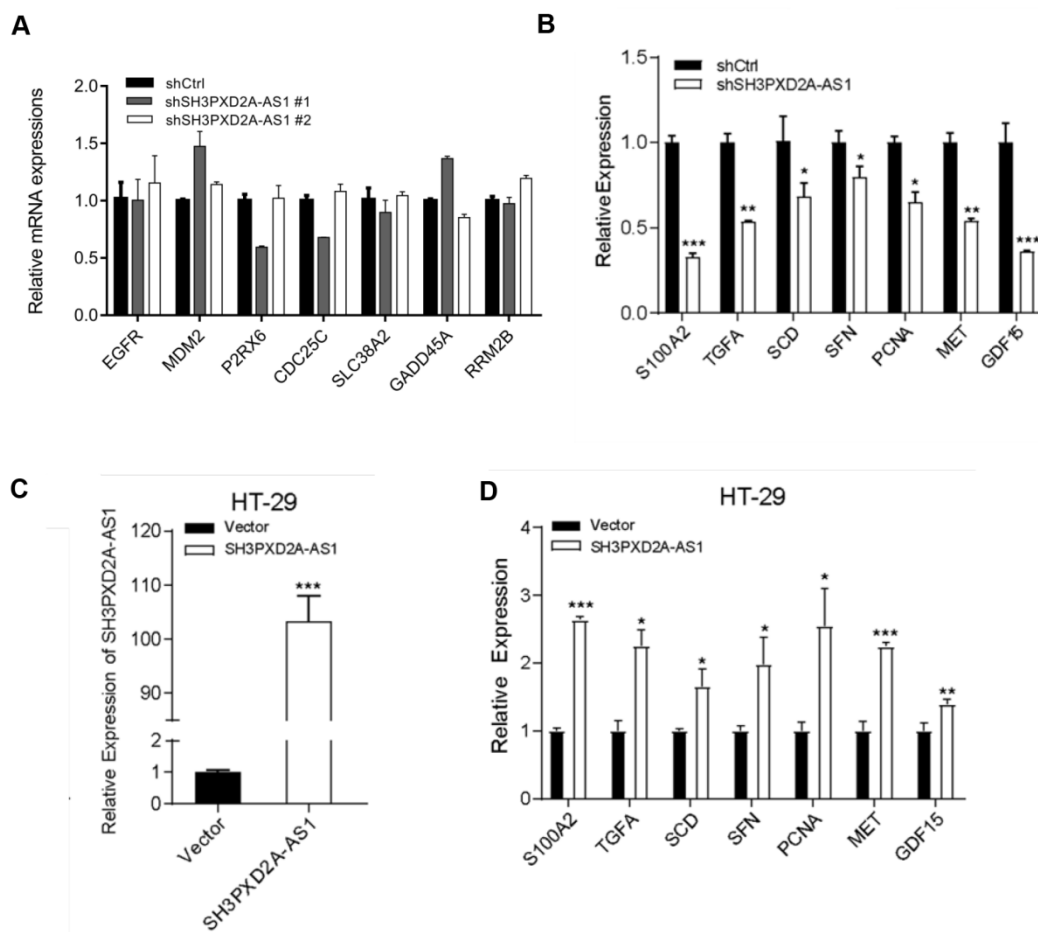

Figure S6. SH3PXD2A-AS1 regulates p53 target genes. (A) Relative mRNA expressions of p53 targets those not changed in SH3PXD2A-AS1 knockdown SW620 cells. (B) Relative mRNA levels of several p53 targets in xenograft tumors. (C-D) Relative mRNA levels of several p53 targets in SH3PXD2A-AS1 overexpression HT29 cells.

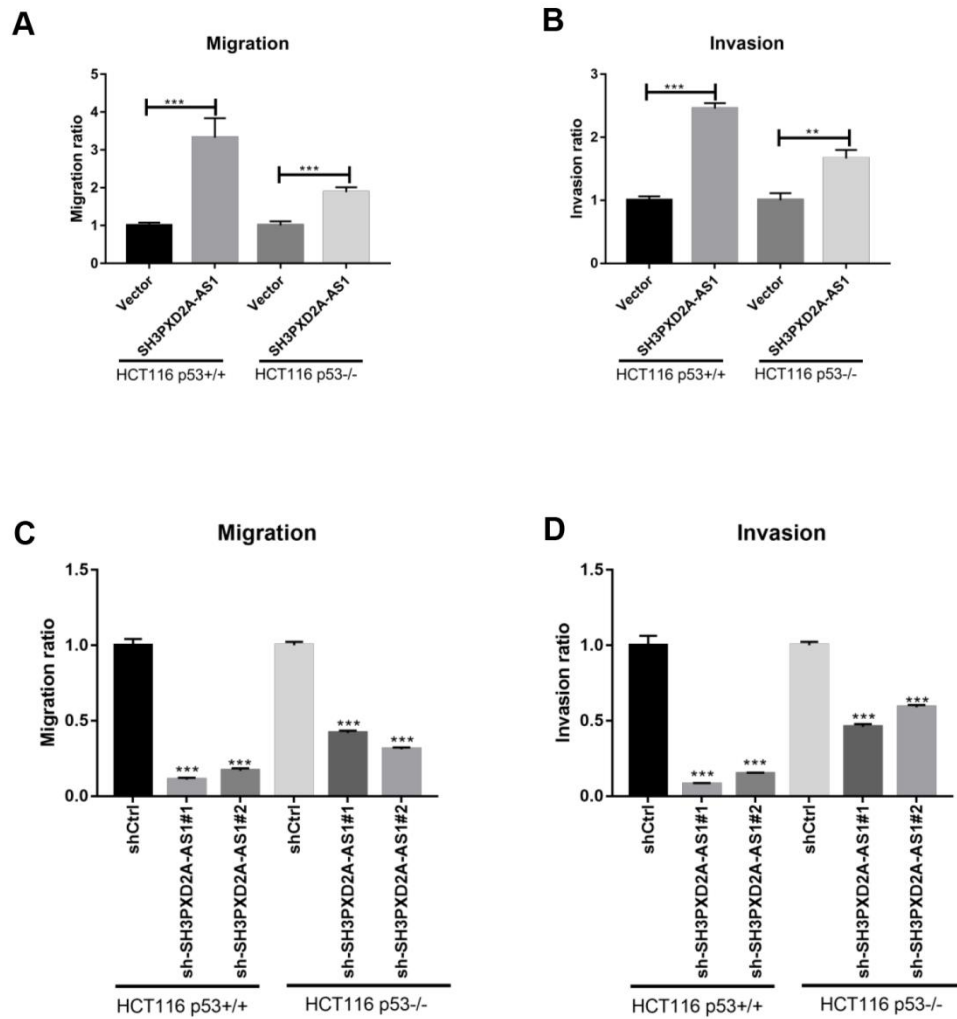

Figure S7. Effects of SH3PXD2A-AS1 on cell migration and invasion in p53^{-/-} HCT116 cells. (A-D) Effects of SH3PXD2A-AS1 overexpression or knockdown on cell migration and invasion in p53^{-/-} HCT116 cells. **p<0.01 and ***p < 0.001 by two-tailed Student's t test.

Figure S8. Correlation analysis of relative mRNA levels of SH3PXD2A-AS1 and MET by using the GEO dataset (GSE14333).
